Filling, priming, and closing the pump bag

Before filling the pump bag, rub the empty bag between your fingers to break the inside suction. If you don’t pull open the bag before filling, food will spill out the top. Pour slowly!

Once you’ve filled the bag to the desired amount, PUSH down on the blue cap while TWISTING it closed.

Push down at each of the four openings/flanges of the lid to ensure it’s closed tightly.
REMOVE CAP from RED ADAPTER TIP at the end of the tubing and hold adapter in one hand.

With the other hand, FLIP bag over and gently squeeze so the air bubble moves up towards the tubing.

With one hand, SQUEEZE the TEAL TUBING at the end opposite the loop, where the droplet symbol is located. At the same time, SQUEEZE the upside-down BAG. You will see the air and then the food move up through the tubing.

Once air is out of bag, FLIP the bag right side up and continue squeezing until food runs out of the red adapter. Load feed set into feeding pump. Fill extension set with water and clamp it. Plug adapter into extension set. Unclamp extension set.
Loading bag into the pump and starting a feeding

Open DOOR of pump by pushing on the tab above the display screen.
Stretch TEAL TUBING LOOP around the outside of the black WHEEL.

Fit PLASTIC CASSETTE into SLOTS.
Check that tubing is not obstructing the door. Close DOOR.
Make sure feed set adapter is connected to extension set and the extension set is UNCLAMPED and connected to the feeding tube.
Press and HOLD the ON/OFF button for 3 seconds.
When you see a number (the rate) with ml/hr next to it on the display, press RUN/PAUSE.
When you hear 3 short beeps and see a circle around the word “run” on the display, the pump is running.

Troubleshooting

The feeding pump is beeping! What should I do?

**Message on display screen:** NO FLOW IN

Problem: Food has stopped flowing into the pump from the pump bag.
Solution: Find and fix the blockage.
Is there FOOD in the bag?
If YES, see below. If NO, skip to next section.

Press RUN/PAUSE and look for kinks in the tubing between the pump bag and the pump.
Straighten kinks out of the tubing.
Press RUN/PAUSE again.
Listen for 3 beeps and look for RUN on the display; the pump is running.
Message on display screen: NO FLOW IN (continued)

Is the bag empty?

![Empty bag with no air:](Image)

If yes, press RUN/PAUSE.
Refill and close bag, removing as much air as possible.
Press RUN/PAUSE again.
Listen for 3 beeps and look for RUN on the display; the pump is running.

**NOTE:** Sometimes you get multiple alarms consecutively, even after fixing the source of the alarm. Pressing RUN/PAUSE and then holding the PRIME button down for 5 seconds before pressing RUN/PAUSE again sometimes clears the problem.
Message on display screen: NO FLOW OUT

Problem: Food has stopped flowing out of the pump
Solution: Find and fix the blockage
Is the EXTENSION SET clamped?
If YES, press RUN/PAUSE, UNCLAMP, and then press RUN/PAUSE again.
Listen for 3 beeps and look for RUN on the display; the pump is running.
If the extension set is NOT CLAMPED:
Press RUN/PAUSE and look for kinks in the tubing between the pump and the feeding tube.

Straighten tubing.
Press RUN/PAUSE again.
Listen for 3 beeps and look for RUN on the display; the pump is running.
Message on display screen: NO FOOD

Problem: Air has gotten into the line from the bag.
Solution: Press RUN/PAUSE.
Reposition bag so food is at bottom of bag. Refill bag if necessary.

**NOTE:** If a large amount of air is present in the tubing, it may be necessary to disconnect the pump tubing from the extension tube before removing air from the tubing to avoid feeding air into the stomach.

Press and HOLD PRIME until food moves through tubing coming out of PUMP. Press RUN/PAUSE again.

Listen for 3 beeps and look for RUN on the display; the pump is running.
Message on display screen: LOAD SET

Problem: Feed set is not loaded into pump.
Solution: Load feed set into pump.
Press RUN/PAUSE.
Open DOOR of pump by pushing on the tab above the display screen.
Stretch TEAL TUBING around the outside of the black WHEEL.
Fit PLASTIC CASSETTE into SLOTS.
Check that tubing is not obstructing the door.
Close DOOR tightly.
Press RUN/PAUSE again.
Listen for 3 beeps and look for RUN on the display; the pump is running.

Message on display screen: SHUT DOOR
Solution: Press RUN/PAUSE
Close pump door tightly; press RUN/PAUSE.
Listen for 3 beeps and look for RUN on the display; the pump is running.
Message on display screen: PUSH RUN TO FEED
This alarm will sound after 2 minutes unless the word RUN is on the display indicating that the pump is running.
Solution: Press RUN/PAUSE to stop alarm; press RUN/PAUSE again to resume feed. Listen for 3 beeps and look for RUN on the display; the pump is running.

Message on display screen: LOW BATT with distinctive alarm tone
Solution: Plug pump into charger

Message on display screen: ER##, ERRA, or ERRZ and a continuous alarm tone
Make sure pump door is closed tightly.
Press and hold ON/OFF until pump shuts down.
Restart pump by holding ON/OFF BUTTON for 3 seconds, then verify pump settings. If settings are correct, press RUN/PAUSE.
Listen for 3 beeps and look for RUN on the display; the pump is running.

NOTE: An ER##/ERRA/ERRZ may ERASE the rate, dose, and timing of the food being delivered. If you see 0.1 on the display when you restart the pump, contact the parent or caregiver.
If the pump DOES NOT RESTART or you are unsure of the correct pump settings, contact the parent or caregiver at the phone number below.
